PROFESSIONAL SUMMARY

Procurement operations professional with 3+ years of experience managing end-to-end P2P cycles, services sourcing, vendor coordination, and contract governance across education and infrastructure sectors. Hands-on experience supporting statement of work processes, master service agreement compliance, and supplier relationship management. Proficient in SAP Business One, advanced Excel, and Power BI. Certified in Generative AI for Procurement Professionals and Six Sigma Yellow Belt. Adept at managing multi-stakeholder procurement queues, resolving supplier queries, and driving process compliance in fast-paced environments.

PROFESSIONAL EXPERIENCE

Education Development Trust	London, United Kingdom
<i>Business Operations Analyst</i>	<i>Jul 2023 – Sep 2025</i>
- Managed end-to-end P2P cycle including purchase requisitions, statement of work (SOW) initiation, vendor approvals, invoice verification, and payment tracking across 20+ active supplier relationships — ensuring zero processing delays - Supported contract governance workflows by reviewing procurement requests against master service agreement (MSA) terms, flagging non-compliant SOWs, and coordinating corrective actions with requesters and suppliers - Conducted RFP and tendering support for services-category procurement — defining scope, coordinating pre-bid documentation, evaluating vendor submissions, and driving compliant sourcing outcomes - Managed procurement queue independently by triaging requests, coordinating with internal stakeholders and suppliers, resolving discrepancies, and escalating risks to ensure operational continuity - Operated SAP Business One to support procurement data management, purchase order tracking, and supplier record maintenance across operational workstreams - Built automated Excel-based procurement trackers and KPI dashboards to monitor SOW approval status, spend, and supplier performance — reducing manual reporting effort by 300+ hours annually - Standardised procurement templates, audit documentation, and governance trackers — improving reporting consistency and audit-readiness; reduced review turnaround times by 30% - Produced executive-level procurement reporting materials to support leadership planning, budget reviews, and ongoing procurement governance	

Prasant Samantray (Public Infrastructure & Development)	Sambalpur, India
<i>Project Analyst</i>	<i>Feb 2021 – Jul 2022</i>
- Managed procurement and supply chain activities for infrastructure projects valued at Rs 5 Cr — including vendor identification, benchmarking, shortlisting, and services sourcing across multiple project workstreams - Supported RFP and tendering processes for services-category spend: coordinated with contractors, consultants, and suppliers to define scope, obtain quotes, and evaluate proposals against MSA-equivalent terms - Maintained accurate SOW records and procurement documentation using Excel and project tracking tools, ensuring version-controlled audit trails for all contractual activities - Verified invoices, tracked vendor payments, and ensured procurement compliance — maintaining accurate budget reporting and governance documentation across all project workstreams - Managed KPI dashboards and governance reports; partnered with local authorities and contractors to align execution with compliance requirements, reducing permit-related delays by 20% - Coordinated resource planning and operational timelines using Microsoft Project and Excel, contributing to 100% on-time project delivery
